Stroke

Profile

Qualifying as an Occupational Therapist in 2006, Lara has a wide range of clinical and rehabilitative experience across acute and community settings. She developed her skills in trauma orthopaedics, elderly care, vascular, oncology, neurology, and medical wards before moving into community learning disability services, challenging behaviour teams, and acute mental health.

Lara has worked both in the UK and Australia, gaining extensive experience supporting individuals with complex needs. Since 2013, she has specialised in case management, working with adults and young people with serious and life-changing injuries including brain injury, amputation, spinal cord injury, and complex polytrauma.

Lara provides functional, cognitive, and perceptual assessments, and is highly skilled in managing housing adaptations, specialist equipment, and complex care and therapy packages. She works collaboratively with clients, families, statutory services, and legal teams to deliver structured, outcome-focused rehabilitation.

Her clinical knowledge is complemented by a deep understanding of the litigation process, gained while working as a Rehabilitation Consultant for a global business insurer. This experience ensures her reports are timely, evidence-based, and aligned with SMART goal setting to demonstrate measurable progress throughout the rehabilitation journey.

Lara responds empathically to the clinical, psychological, and environmental needs of her clients and is vigilant in identifying safeguarding issues and navigating complex family dynamics. She is experienced in coordinating multidisciplinary input, managing both physical and psychological aspects of recovery, and supporting clients through periods of significant trauma.
